

I am in favor of opposing this bill HR 4026 which restricts information such as traffic and weather to paying consumers of XM radio. I have just become a new subscriber to this satellite radio and love the quality and variety of this product. I live in South Florida and hope that we will also get coverage of traffic and weather in this area from XM as well. I love the fact that you can get that information instantly when you need it. If the people in congress tried XM radio they could see the immediate benefits to the consumer.

Sincerely,

Bruce Novak
